

International Material Flow Management

Are you interested in developing Sustainable Business Solutions? Are you fascinated by International Project Management? Are you attracted by the Application of Clean Technologies? Are you eager to become a System Change Manager?

## Joint German-Turkey Dual Master Degree Program (M.Eng.)

First year of study at the Akdeniz University (AKD) in Turkey followed by one year at the Trier University of Applied Sciences, Environmental Campus Birkenfeld (ECB) in Germany.

Degree: Upon successful completion the students will be awarded with the title "Master of Engineering in International Material Flow Management" by the Trier University of Applied Sciences and the Akdeniz University

## **Study Focus:**

The innovative IMAT master degree programs aim to educate and train competent business leaders, capable of understanding and tackling global business development processes of the 21st century. Student will learn to link economic development with environmental protection through creating, financing, implementing and managing new energy and resource efficiency strategies. The interdisciplinary IMAT study course facilitate holistic business and technology management through a combination of economics, engineering, law, natural, social and environmental sciences. Innovative applications of environmental technologies in the fields of sustainable energy-, waste-, water- and resource management are connected with stakeholder network management, life cycle planning, and innovative financing systems.

Master Degree Program in "International Material Flow Management" is supported by the German Federal Ministry of Education and Research (BMBF) and the German Academic Exchange Service (DAAD).

Scholarships for excellent students are available! Apply now!
